**New York**

### The big picture
Kickstart the day in style by seeing the sun come up over Manhattan as the city begins to stir. The Empire State Building offers an intimate sunrise experience every morning from its observation deck on the 86th floor, a treat that’s limited to 100 people a day.

**IN FOCUS**
Since its conception in 1908, the High Line – a stretch of elevated railway that slices through the Lower West Side and converted into a landscaped public park – has become a symbol of green urbanism, attracting millions of visitors each year. This year will see the arrival of the High Line Park, a superlative inspiration by the Parks Foundation located in London’s Vauxhall Quarter, that will be delivered in a showcase of contemporary art.

“New York is really the Big Onion with layers to peel off each visit”

“Even for the Big Apple, New York is normally more than a city with different layers to peel off during each visit. I love the Retail District (North of Manhattan) Park, a neighborhood that incorporates everything from art to food to music. You can enjoy the best of the arts, you should visit the National Museum of the American Indian, the Brooklyn Bridge, the Central Park Zoo, the Empire State Building, and Central Park. And don’t forget to visit the metropolis that is a part of the Manhattan skyline. The city that never sleeps!”
